Delaware Rural Water Association Presents:

5 Sure-fire Ways to a Coliform "Hit" in Your Water System... or Worse

Tuesday, September 12th 2023

Operators understand just how easy it is to introduce pathogenic organisms into your water system. This program looks at 5 little-known-routes to potential introduction of pathogens. Through superb computer graphics and supporting texts we'll review the typical disinfection protocol in repairs to distribution systems and examine basic bacteriological sampling techniques. Let's then look at some of the little understood ways that lead to system contamination (Backflow, Stagnation). Finally, we'll look at the most common residual based test methods. See how and why some common Chlorine test methods have little known interferences and may even lead to false Free Chlorine residuals. Learn how to recognize these and other issues.

Time: 9:00am-4:00pm

ECH: 6.0 Hrs. Water - Direct

Location: DRWA Training Facility
210 Vickers Drive
Milford, DE. 19963

Cost: FREE - Funded By EPA

Instructor: Mike Harrington,
C.M. Harrington Corporation
