Delaware Rural Water Association Presents:

**ASSE Backflow Prevention
Assembly Recertification
(Tester, Repairer & Surveyor)**

Saturday, June 15, 2019

Delaware Rural Water Association is pleased to announce that its training center has received recognition and accreditation from the American Society of Sanitary Engineering (ASSE), for Cross Connection Control Certification, ASSE 5000 Standard. This nationally recognized ANSI® accreditation is designed to provide qualified students a national certification for obtaining a certified backflow assembly tester status not only in the State of Delaware, but throughout the United States.

Location: DRWA Training Facility
210 Vickers Drive
Milford, DE 19963
Cost: \$525.00 - **Lunch Will Be Provided**
Time: 8:00 a.m. - 5:00 p.m.
ECH's: 8 Hrs. Water - Direct
Instructor: Nick Azmo, Apollo Flow Controls

About DRWA?

Mission Statement

The mission of the Delaware Rural Water Association (DRWA) is to improve the quality of utility services for rural Delaware while protecting our natural resources.

To accomplish this mission and to protect the quality of life in rural Delaware, the Delaware Rural Water Association was incorporated in 1990 as a non-profit association. A volunteer Board of Directors that include water operators, town managers, and supervisors throughout the state of Delaware governs.

Protecting the Public Health

DRWA promotes public health protection for rural communities and small municipalities. The Association trains and assists rural and small community water professionals in their efforts to provide quality drinking water to their communities, neighbors, and families.

Protecting the Environment

DRWA promotes water conservation and protection through publications and public awareness campaigns. Information and research provided to government officials aid in the development of effective regulations. DRWA is an affiliate of the National Rural Water Association who operates what EPA officials call "the most successful groundwater protection program in the country".

Training

Specialized training sessions provide water professionals with an opportunity to resolve problems by sharing ideas with state and federal agencies, engineers, contractors, manufacturers, suppliers, and other water system personnel. Training sessions cover a broad spectrum of needs. Subjects range from water treatment and federal water and wastewater regulations to financial management practices and operator certification. The training allows water professionals to upgrade their skill, improve the quality of their utility's service, and protect their community's health.

DRWA's Annual Technical Conference and Exhibition draws water and wastewater professionals, government officials, manufacturers, and suppliers together in one location, allowing them to participate in specialized training and the ability to learn about the latest trends in technology, government regulations, and system management techniques.

DRWA's On-Site Training Unit (OSTU) was developed in cooperation with the Office of Drinking Water and funded through an EPA grant. The unit has classroom space, resource materials, and industry equipment. DRWA has traveled around the state to operators who can't leave their systems to attend training. Hands-on training has been provided for water testing, meter testing, cross-connection, fluoridations, well security and more.

ASSE Backflow Prevention Assembly Recertification (Tester, Repairer & Surveyor)

Date: Saturday, June 15, 2019

Time: 8:00 a.m. - 5:00 p.m.

Cost: \$525 per person - Lunch Will Be Provided

ECHs: 8 Hrs. Water Direct

Course Prerequisite: Current ASSE Backflow Prevention Certifications Are Required.

This course is for individuals currently holding a ASSE Backflow Prevention Assembly Tester, Repairer &/or Cross Connection Control Surveyor Certification but whose certification is due to expire. Individuals must hold a valid certification for three years from the date of initial certification and/or recertification. Recertification will be awarded after successful completion of a hands-on lab test (RP and DC) and a written exam (1 hour time limit). All exams are closed book.

Upon successful completion of both the written and hands-on exam, the student will receive a three (3) year National ASSE Certification.

Class Size: Minimum-12, Maximum-16
