Course Prerequisite

If You Do Not Hold A ASSE
 Backflow Prevention Assembly Tester
 Certification You Must Have Five
 (5) Years Of Documented
 Experience In The Field Of
 Plumbing, Water / W a s t e w a t e r
 Distribution, Collection Or Another
 Related Industry Field To Receive This
40 Hr. ASSE Cross Connection
Surveyor Certification

You Will Be Required To Complete
100 Question Test On The Last Day

Please indicate the State(s) that you
 will be surveying in:

Delaware Rural Water Association Presents:

**ASSE Cross-Connection
Control Surveyor
Certification**

May 6 - 10, 2019

Delaware Rural Water Association is pleased to announce that it's training center has received recognition and accreditation from the American Society of Sanitary Engineering (ASSE), for Cross Connection

Control Certification, ASSE 5000 Standard. This nationally recognized ANSI® accreditation is designed to provide qualified students a national certification for obtaining a certified backflow assembly tester status not only in the State of Delaware, but throughout the United States.

Location: DRWA Training Facility
 210 Vickers Drive
 Milford, DE 19963

Cost: \$695.00 - Lunch Will Be Provided
 Time: 8:00 a.m. - 5:00 p.m. Daily
 ECHs: 40 Hrs. Water - Direct
 Instructor: Steve Fox, HydroCorp

About DRWA?

Mission Statement

The mission of the Delaware Rural Water Association (DRWA) is to improve the quality of utility services for rural Delaware while protecting our natural resources.

To accomplish this mission and to protect the quality of life in rural Delaware, the Delaware Rural Water Association was incorporated in 1990 as a non-profit association. A volunteer Board of Directors that include water operators, town managers, and supervisors throughout the state of Delaware governs.

Protecting the Public Health

DRWA promotes public health protection for rural communities and small municipalities. The Association trains and assists rural and small community water professionals in their efforts to provide quality drinking water to their communities, neighbors, and families.

Protecting the Environment

DRWA promotes water conservation and protection through publications and public awareness campaigns. Information and research provided to government officials aid in the development of effective regulations. DRWA is an affiliate of the National Rural Water Association who operates what EPA officials call "the most successful groundwater protection program in the country".

Training

Specialized training sessions provide water professionals with an opportunity to resolve problems by sharing ideas with state and federal agencies, engineers, contractors, manufacturers, suppliers, and other water system personnel. Training sessions cover a broad spectrum of needs. Subjects range from water treatment and federal water and wastewater regulations to financial management practices and operator certification. The training allows water professionals to upgrade their skill, improve the quality of their utility's service, and protect their community's health.

DRWA's Annual Technical Conference and Exhibition draws water and wastewater professionals, government officials, manufacturers, and suppliers together in one location, allowing them to participate in specialized training and the ability to learn about the latest trends in technology, government regulations, and system management techniques.

DRWA's On-Site Training Unit (OSTU) was developed in cooperation with the Office of Drinking Water and funded through an EPA grant. The unit has classroom space, resource materials, and industry equipment. DRWA has traveled around the state to operators who can't leave their systems to attend training. Hands-on training has been provided for water testing, meter testing, cross-connection, fluoridations, well security and more.

ASSE Cross Connection Surveyor Certification

Dates: May 6 - 10, 2019

Time: 8:00 a.m. - 5:00 p.m. Daily

Costs: \$695 per person - Lunch Will Be Provided

ECHs: 40 Hrs. Water Direct

Course Prerequisite:

If You Do Not Hold A ASSE Backflow Prevention Assembly Tester Certification You Must Have Five (5) Years Of Documented Experience In The Field Of Plumbing, Water/Wastewater Distribution, Collection Or Another Related Industry Field To Receive This 40 Hr. ASSE Cross Connection Surveyor Certification

You Will Be Required To Complete 100 Question Test On The Last Day

The course will provide instruction in the proper techniques to survey connections to the public water supply and determine if the connections are correctly installed. It will also teach participants how to list proper and improper connections while recognizing state and local regulations and ordinances that affect backflow as stated in the ASSE Qualification Standard Series 5120. Subjects covered in this course include: policies and procedures, rules and regulations, record keeping, public relations, plan checks and site surveys. The necessary items of regulations are discussed along with specific policies and procedures needed to carry out an effective cross-connection survey program in the public water supply. Participants will be taught how to plan and conduct an actual site survey of a facility in order to determine which type of backflow protection, if any, is required to make the facility compliant with cross-connection control regulations. **Individuals successfully completing the course will receive a certificate from ASSE.**
