Delaware Rural Water Association Presents:

**ASSE Backflow Prevention
Program Administrator
Certification**

**August 15 - 18, 2022
Monday - Thursday**

Delaware Rural Water Association is pleased to announce that its training center has received recognition and accreditation from the American Society of Sanitary Engineering (ASSE), for Cross Connection Control Certification, ASSE 5000 Standard. This nationally recognized ANSI® accreditation is designed to provide qualified students

a national certification for obtaining a certified backflow assembly tester status not only in the State of Delaware, but throughout the United States.

Location: DRWA Training Facility
210 Vickers Drive
Milford, DE. 19963
Cost: \$625.00 Per Person
Time: 8:00 am - 5:00 pm Daily
Instructor: Glen Adamus, HydroCorp

About DRWA?

Mission Statement

The mission of the Delaware Rural Water Association (DRWA) is to improve the quality of utility services for rural Delaware while protecting our natural resources.

To accomplish this mission and to protect the quality of life in rural Delaware, the Delaware Rural Water Association was incorporated in 1990 as a non-profit association. A volunteer Board of Directors that include water operators, town managers, and supervisors throughout the state of Delaware governs.

Protecting the Public Health

DRWA promotes public health protection for rural communities and small municipalities. The Association trains and assists rural and small community water professionals in their efforts to provide quality drinking water to their communities, neighbors, and families.

Protecting the Environment

DRWA promotes water conservation and protection through publications and public awareness campaigns. Information and research provided to government officials aid in the development of effective regulations. DRWA is an affiliate of the National Rural Water Association who operates what EPA officials call "the most successful groundwater protection program in the country".

Training

Specialized training sessions provide water professionals with an opportunity to resolve problems by sharing ideas with state and federal agencies, engineers, contractors, manufacturers, suppliers, and other water system personnel. Training sessions cover a broad spectrum of needs. Subjects range from water treatment and federal water and wastewater regulations to financial management practices and operator certification. The training allows water professionals to upgrade their skill, improve the quality of their utility's service, and protect their community's health.

DRWA's Annual Technical Conference and Exhibition draws water and wastewater professionals, government officials, manufacturers, and suppliers together in one location, allowing them to participate in specialized training and the ability to learn about the latest trends in technology, government regulations, and system management techniques.

DRWA's On-Site Training Unit (OSTU) was developed in cooperation with the Office of Drinking Water and funded through an EPA grant. The unit has classroom space, resource materials, and industry equipment. DRWA has traveled around the state to operators who can't leave their systems to attend training. Hands-on training has been provided for water testing, meter testing, cross-connection, fluoridations, well security and more.

ASSE Backflow Prevention Program Administrator Certification

Dates: August 15 - 18, 2022 (Monday - Thursday)

Time: 8:00 am - 5:00 pm Daily

Cost: \$625.00 Per Person

This course is designed to train participants in the knowledge of codes and regulations from the federal, state and local levels, and on approved listing agencies pertaining to cross-connection control and backflow prevention. The individual shall be knowledgeable on the proper implementation of a backflow prevention and maintenance program under all applicable ASSE standards that pertain to containment protection. The program administrator shall be knowledgeable of all professional requirements stated in ASSE Series 5000's professionals qualifications standards for backflow prevention assembly testers, repairers and surveyors.

Upon completion of this course and the written and individual performance tests where each participant must demonstrate his or her ability, the participants will be issued an "ASSE Certificate of Completion" and an "ASSE Program Administrator Certification Card" and an "ASSE Program Administrator Certification Number" from the American Society of Sanitary Engineering.

Class Size: Minimum - 12 / Maximum - 16
