This Course Is Funded By: EPA

Delaware Rural Water Association Presents:
America's Water Infrastructure Act - Helping Water Suppliers Meet The Requirements
Tuesday, September 15, 2020

This course will cover the requirements of AWIA, explain the process for preparing a risk assessment using EPA’s VSAT tool and other guidance, outline the elements of an emergency response plan, and provide details on how to submit certifications to EPA for both.

Time: 9:00 a.m. - 12:00 p.m.
ECHs: 3.0 Hrs. - Water - Indirect
Location: DRWA Training Facility
210 Vickers Drive
Milford, DE 19963
Cost: Free - Funded By EPA
Instructor: Patti Kay Wisniewski, EPA Region III

About DRWA

Mission Statement
The mission of the Delaware Rural Water Association (DRWA) is to improve the quality of utility services for rural Delaware while protecting our natural resources.

To accomplish this mission and to protect the quality of life in rural Delaware, the Delaware Rural Water Association was incorporated in 1990 as a non-profit association. A volunteer Board of Directors that include water operators, town managers, and supervisors throughout the state of Delaware governs.

Protecting the Public Health
DRWA promotes public health protection for rural communities and small municipalities. The Association trains and assists rural and small community water professionals in their efforts to provide quality drinking water to their communities, neighbors, and families.

Protecting the Environment
DRWA promotes water conservation and protection through publications and public awareness campaigns. Information and research provided to government officials aid in the development of effective regulations. DRWA is an affiliate of the National Rural Water Association which operates what EPA officials call “the most successful groundwater protection program in the country.”

Training
Specialized training sessions provide water professionals with an opportunity to resolve problems by sharing ideas with state and federal agencies, engineers, contractors, manufacturers, suppliers, and other water system personnel. Training sessions cover a broad spectrum of needs. Subjects range from water treatment and federal water and wastewater regulations to financial management practices and operator certification. The training allows water professionals to upgrade their skill, improve the quality of their utility’s service, and protect their community’s health.

DRWA’s Annual Technical Conference and Exhibition draws water and wastewater professionals, government officials, manufacturers, and suppliers together in one location, allowing them to participate in specialized training and the ability to learn about the latest trends in technology, government regulations, and system management techniques.

DRWA’s On-Site Training Unit (OSTU) was developed in cooperation with the Office of Drinking Water and funded through an EPA grant. The unit has classroom space, resource materials, and industry equipment. DRWA has traveled around the state to operators who can’t leave their systems to attend training. Hands-on training has been provided for water testing, meter testing, cross-connection, fluoridations, well security and more.
