Delaware Rural Water Association Presents:

Emerging Contaminants in Water & Wastewater

Thursday, April 13th 2023

Water and Wastewater facilities across the United States are being impacted by Emerging Contaminants such as PFAS above the USEPA health advisory levels and individual state regulatory standards. Contaminants of emerging concern (CECs), including pharmaceuticals, poly fluoroalkyl substances (PFAS) and personal care products (PPCPS). As the scope of the potential impacts of these compounds grows, it is important that water quality professionals be able to evaluate these impacts on human health and aquatic life.
