Vacuum systems are utilized for a host of applications particularly in industrial, building and municipal environments, particularly in the conveyance of wastewater. This session will focus specifically on vacuum systems, which collect liquid primarily within municipal applications. Furthermore, it will highlight the design, constructibility, reliability, flexibility and cost benefits of such a technology. Municipal sewer projects in Alloway Township, NJ and Provincetown, MA & Plum Island, MA will also be discussed among others nationwide.
About DRWA

Mission Statement
The mission of the Delaware Rural Water Association (DRWA) is to improve the quality of utility services for rural Delaware while protecting our natural resources.

To accomplish this mission and to protect the quality of life in rural Delaware, the Delaware Rural Water Association was incorporated in 1990 as a non-profit association. A volunteer Board of Directors that include water operators, town managers, and supervisors throughout the state of Delaware governs.
